RECITALS

REVIEW AND ACCEPTANCE: It is the policy of IGTC2019 Tokyo to accept for publication only original contributions to the engineering literature. In most cases, this means that a paper should incorporate substantial new information not previously published. Under certain circumstances, reviews or collations or analyses of information previously published in scattered form may be acceptable. Material which is not original must be identified by footnotes and/or bibliography.

Receipt of a manuscript by the review committee does not constitute acceptance for presentation and publication by IGTC2019. All manuscripts and Author-prepared papers accepted are subject to editing.

APPROVALS AND CLEARANCE: It is the Author's responsibility to secure such company approvals as may be required. Government clearance on classified material should be obtained where necessary. If approvals or clearances are involved, the original manuscript should note that these have been obtained. Material not approved should be omitted from the manuscript.

AUTHORS: It is IGTC2019 Tokyo policy that all those who have participated significantly in the technical aspects of an IGTC2019 Tokyo paper should be recognized as Co-Authors or cited in the acknowledgements.
